Relief Reports that its U.S. Collaboration Partner has Announced Receipt of Initial Report of Patient Safety and Survival from Right to Try Use of Aviptadil During Omicron Surge

Geneva, Switzerland, January 27, 2022 – RELIEF THERAPEUTICS Holding SA (SIX: RLF, OTCQB: RLFTF, RLFTY) ("**Relief**"), a biopharmaceutical company seeking to provide patients therapeutic relief from serious diseases with high unmet need, reported today that the parent company, NRx Pharmaceuticals, Inc. (Nasdaq: NRXP) ("**NRx**"), of its collaboration partner with respect to aviptadil, NeuroRx, Inc. ("**NeuroRx**"), has announced receipt of a first safety report from a Southwestern hospital where physicians have administered aviptadil to patients with COVID-19 respiratory failure. According to the press release, the patients were treated under the Federal Right to Try Law that gives access to investigational medicines for patients who have been diagnosed with life-threatening diseases or conditions, who have tried all approved treatment options, and who are unable to participate in a clinical trial to access certain unapproved treatments. The press release stated that of the first 19 patients treated by December 31, 2021, three had died and 16 (84%) were reported to be alive by January 22, 2022. The release also reported that this Right to Try use of aviptadil occurred during the current Omicron surge, although patients were not necessarily tested for the specific COVID variant that caused their ICU admission. NRx reported that no serious adverse events were reported. The related NRx press release can be accessed through the following [link](#).

ABOUT RELIEF

Relief focuses primarily on clinical-stage programs based on molecules with a history of clinical testing and use in human patients or a strong scientific rationale. Relief's lead drug candidate, RLF-100™ (aviptadil), a synthetic form of Vasoactive Intestinal Peptide (VIP), is in late-stage clinical testing in the U.S. for the treatment of respiratory deficiency due to COVID-19 through Relief's collaboration partner in the U.S., NeuroRx. As part of its pipeline diversification strategy, in March 2021, Relief entered into a Collaboration and License Agreement with Acer Therapeutics for the worldwide development and commercialization of ACER-001. ACER-001 is a taste-masked and immediate release proprietary powder formulation of sodium phenylbutyrate (NaPB) for the treatment of Urea Cycle Disorders and Maple Syrup Urine Disease. Finally, Relief's recently completed acquisitions of APR Applied Pharma Research SA and AdVita Lifescience GmbH, bring to Relief a diverse pipeline of marketed and development-stage programs.

RELIEF THERAPEUTICS Holding SA is listed on the SIX Swiss Exchange under the symbol RLF and quoted in the U.S. on OTCQB under the symbols RLFTF and RLFTY. For more information, visit www.relieftherapeutics.com. Follow us on [LinkedIn](#).
